Teaching with Writing (TWW) Tip

Arranging Virtual Peer Response

Rationale: In addition to enhancing students' understanding of course content, writing processes, and how readers might interpret students' writing, peer response underscores students' participation in a community of writers and readers. Virtual peer response can be used effectively in face-to-face classrooms, online courses, and in hybrid models. Maximize benefits by providing clear guidelines and expectations for writing peer comments in virtual environments.

Define Peer Response
Clear up any possible misconceptions of peer response with this video from the University of Minnesota’s department of Writing Studies. The video introduces and defines peer response processes, and could be embedded within a course Moodle site or projected during class time.

Design a Process/Space for Peer Response Activities
Virtual peer response can be facilitated through Moodle: students can upload drafts to a designated, small-group Moodle forum; Moodle’s “Workshop” is another option. Virtual peer response can occur in Google Docs, wherein peers can insert comments, questions, and other responses to drafts. Alternately, the open-source Pirate Pad allows writers and readers to chat in real time; this tool includes a “time slider” which will reveal how the writer revised the draft subsequent to peer reviewers’ comments.

Make Your Expectations Explicit
Keep students on task with written guidelines for the peer response process. Take time to define or discuss relevant terminology (Bernhardt, 2006). Do you want students to provide substantive responses, including revision suggestions? To ask questions as an interested reader? To respond directly to writers’ self-identified concerns and questions? To summarize the drafts' major strengths and areas for revision/elaboration? To apply the assignment grading criteria to the draft, such that the writer gains a clearer sense of how well the draft meets those criteria?

Emphasize the benefits of balanced, strategic, and specific comments. Balanced comments identify and describe both the draft's accomplishments and the draft's missteps. Strategic responses—questions, suggestions, and observations—encourage the writer to refine the draft in helpful ways; specific comments help the writer perceive the draft through peers’ astute observations.

The November 2013 TWW Tip can help you make your expectations clear. You might also consider sharing the Commenting Strategies video.
**Build the Response Process into the Course**
Well-designed and intentionally-sequenced virtual peer response activities enhance student learning and helps instructors manage the paper load, especially in large-enrollment courses. The first round of peer response, for instance, could ask students to focus on "global" issues such as audience, clarity of purpose, and organization; the second round (on a revised draft) would focus on sentence-level concerns. Ask writers to consider peers’ responses carefully and deliberately, and to address those responses in a revision memo. Finally, consider the possibility of making peer response a portion of the assignment’s grade.
